

# Broadband Internet

Fast, feature-rich connectivity your business can rely on

Every second your business waits on slow Internet access to share files, collaborate with coworkers, sell products/ services or access critical data is time and money wasted. With reliable, business-level Broadband Internet access from Bright House Networks Business Solutions, your business has the immediate advantage of fast, dependable connectivity to improve productivity, efficiency and success.

Our tiered-access levels enable businesses of all sizes to choose the high-quality, always-on Internet solution that fits their needs, goals and budgets. You can rely on Bright House Networks Business Solutions and our advanced facilities-based hybrid fiber coax network to deliver on your Broadband Internet needs today, and flexibly scale to meet tomorrow's demands

## THE POWER OF BROADBAND INTERNET ACCESS

When you put Broadband Internet access from Bright House Networks Business Solutions to work for you, you get the advantage of business-fast Internet access and a highly reliable network infrastructure.

### Do More

- Achieve business goals with reliable, always-on Internet access
- Select the right speed for your business today and as your needs grow with tiered-bandwidth levels
- Empower employees to connect to your network from anywhere with Virtual Private Network (VPN) solutions
- Run advanced applications such as SAP or Oracle, and Web Conferencing and Web/Mail servers

### Get More

- Rapidly transfer data with download speeds ranging from 3 – 50 Mbps
- Stay connected with 25 email accounts included with your service
- Better collaborate and accelerate data transfers across a gigabyte-speed fiber backbone
- Store important data with 2.5 GB email storage space

### Stress Less

- Protect PCs with User-Level Security that provides anti-virus, anti-spam and spyware protection, along with a personal firewall for Windows-based computer systems — at no additional charge
- Implement a business continuity and disaster recovery plan with Automatic Remote Data Backup that saves and stores designated files on a secure, remote server, then automatically and regularly backs up files
